DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group III in Paper of November 14, 2003 is acknowledged. Claims 18-19 are being examined. Claims 1-17 and 20-25 are withdrawn as not reading on the elected invention.

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Title

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

Claims 18-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are not complete in themselves, since they refer to a compound that is recited in a withdrawn claim (claim 10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schreier in view of 5,252,333.

Schreier (page 190, column 2, paragraphs 3 and 4) discloses that lecithin and lithium are useful to treat bipolar disorders.

'333 (column 3, line 63 through column 4, line 29) discloses that lithium salts of omega-3 fatty acids (FA) such as eicosapentaenoic acid and docosahexaenoic acid are effective in treating manic depressive psychosis.

The instant claims differ over Schreier in reciting omega-3 phosphatidylcholine.

The instant claims differ over '333 in reciting omega-3 phosphatidylcholine and bipolar disorder. However, the instant specification discloses (page 3, lines 20-23) that bipolar disorder is a form of psychosis in which the patient alternates between episodes of mania and episodes of depression.

In the absence of a showing of unexpected results commensurate in scope with the claims, it would be obvious to one of ordinary skill in the art that the instant omega-3

Art Unit: 1614

phosphatidylcholine would be hydrolyzed by the body to form an omega-3 FA and lecithin, each of which is taught in the prior art to be useful to treat bipolar disorders.
